

OJO STORES MANAGEMENT PRESENTS

We see everything they ignore.

OJO Sentinel watches your stock, cash, people, deliveries, systems and tax, runs every store day on its own, and tells you, the owner, what is really happening the moment it happens. No manager can hide it from you.

WHY OJO SENTINEL EXISTS

In the noise, things go wrong quietly.

You are running a hundred things at once. By the time you notice a loss, it has usually been going on for weeks. OJO Sentinel was built for the owner who deserves the truth about their business, in real time, without filters.

STOCKROOM

Stock walks out, and the count still says it's all there.

RECORDS

Figures are adjusted and written off. The books still balance.

IN TRANSIT

Deliveries are opened on the road and resealed before they arrive.

THE TILL

Refunds, voids and "discounts" pile up for one cashier.

INBOX

A convincing email asks finance to pay a "new" supplier account.

TOGETHER

Small signals across several people add up to coordinated theft.

OJO SENTINEL PROTECTS

Every shilling that leaks should have been your profit.

Your inventory

From the moment it's ordered to the moment it's sold.

Your money

From the register to the account.

Your people

Knowing who is where, and who is doing what.

Your data

From cyber threats that haven't been named yet.

Your goods

In transit, in storage and on the shelf.

Your building

From intruders, weapons and physical threats.

And your return on investment, because what you don't lose is profit you keep.

CORE CAPABILITIES

Five pillars. One command dashboard.

Physical security, digital protection, inventory control, people tracking and AI threat detection, built as one system that sees across all of them.

01 Physical security

Smart CCTV brain

Connects to the cameras you already own. No rip-and-replace.

Facial recognition

Knows your staff, and flags known offenders on entry.

Restricted area alerts

Anyone without clearance in a stockroom or cash office is escalated instantly.

Weapons detection

Alerts security at once, and can lock the building down automatically.

Day & night modules

At night, any unrecognised presence is treated as an intrusion.

Visible distress

Falls, fights and people in visible distress, judged from what they do.

02 Digital & cyber

Fake email detection

Catches look-alike domains, impersonated executives and “new bank details” scams.

Account protection

Spots password guessing and credential stuffing, and blocks the attacker.

Honeypot traps

Decoy logins, keys and files that expose hackers and insiders who take the bait.

No rip-and-replace. OJO Sentinel is the brain on top of the cameras, sensors, trackers and tills you already run, and it makes sense of all of them together.

03 Inventory & money

Inventory intelligence

Sensors count stock on their own. When a storekeeper's figures don't match, you're told directly.

Goods tamper alerts

Seal and weight checked at every checkpoint, from origin to delivery.

Money tracking

Cash drawer checks, refund and void patterns, and payouts to unknown accounts.

04 People & movement

Satellite & GPS tracking

Vehicles, cargo and key personnel, with route-corridor alerts.

Employee geo-positioning

Who is on site, when they arrived, and time away during a shift.

Phone location checks

Spots faked GPS and impossible travel on driver and staff phones.

05 AI threat detection

Behavioural analysis

Learns each person's normal, and flags what isn't.

Coordinated theft

Joins weak signals across people and places into one finding.

Continuous learning

Every alert you confirm or dismiss makes the next one sharper.

ONE SYSTEM, ONE SCREEN

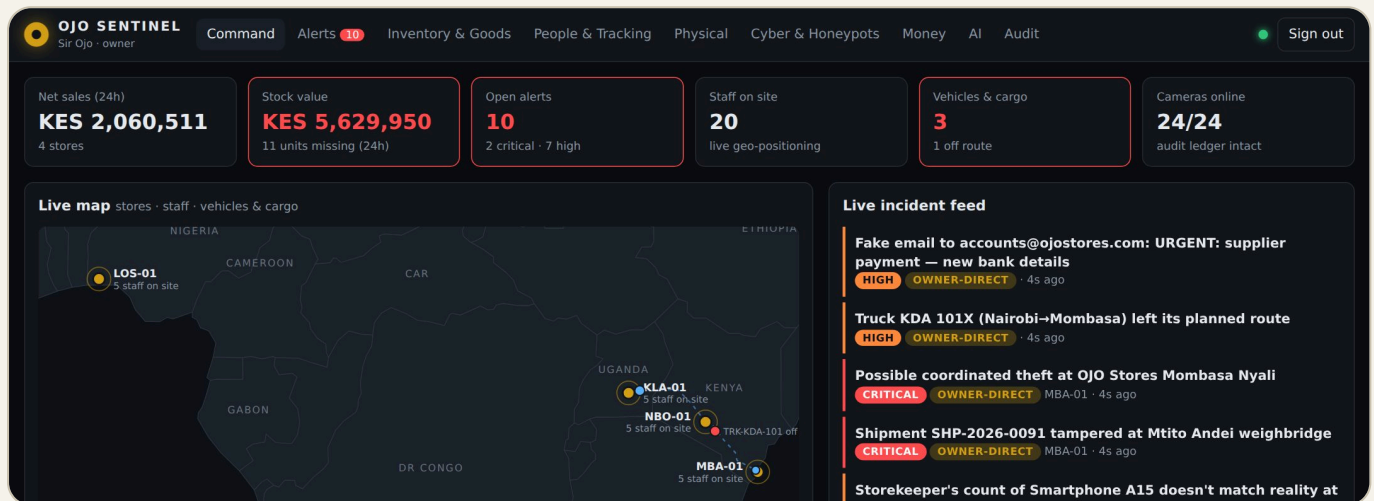

All of it arrives on one owner dashboard, with a live incident feed to your phone.

When something serious happens, you get the alert, the camera feed and a one-tap lockdown.

THE OWNER'S VIEW

One screen. Every store.

Anywhere in the world: live sales, stock value, staff on site, vehicles on the road, cameras and alerts for every branch, on your phone or laptop.

From the live demo: four stores in Nairobi, Mombasa, Kampala and Lagos, mid-morning.

Plain answers, not raw footage.

HIGH OWNER-DIRECT

Storekeeper's count of Smartphone A15 doesn't match reality

Reported 10 · sensors 7 · KES 52,500

The count that didn't add up

Shelf sensors counted the phones on their own. The storekeeper's figure matched the books, not the shelf. The owner saw both side by side.

CRITICAL OWNER-DIRECT

Shipment SHP-2026-0091 tampered at Mtito Andei weighbridge

Seal broken · opened · weight -14.3%

The delivery that got lighter

40 TVs lost weight on the Nairobi–Mombasa road. The alert came with the weighbridge camera feed, and only the owner could release the goods.

HIGH OWNER-DIRECT

Possible coordinated theft at OJO Stores Mombasa Nyali

Refunds · missing stock · false count

Three small things, one pattern

A refund rate far above every peer, missing stock and a wrong count, all in one store within hours. OJO Sentinel joined them into one finding.

OUR UNCOMPROMISING PRINCIPLE

No one can hide the truth from you. **Not even your managers.**

Owner-direct alerts

Theft, tampering, cash and security alerts go straight to you and OJO Stores Management. Only you can close them.

No override for managers

A manager who tries to dismiss an alert, release tampered goods or lift a lockdown is refused, and you are told who tried.

A record that can't be rewritten

Every sensitive action goes into a hash-chained ledger. Edit or delete history and the chain breaks, on screen.

OUR COMMITMENT

Built for the African market and beyond.

It does not sleep

Day and night modes change what counts as normal. At night, any unrecognised person on site is an intrusion.

It gets sharper

It learns from every alert you confirm or dismiss, and from the normal patterns of each business.

It respects your people

Staff are located only during working hours, with consent on file. Faces are kept as templates, never photos. No emotion or lie detection.

FINANCIAL & TAX INTELLIGENCE

You will never owe KRA without knowing it first.

A business also bleeds through missed tax deadlines, lapsed licences and accounting gaps nobody catches until the penalties arrive. OJO Sentinel connects your sales, payroll and purchases to KRA's iTax and eTIMS, and shows you what you owe, when, and whether you're compliant.

YOUR TAX CALENDAR

9 next month**PAYE, SHIF,

fees or contractors

PER PAYMENT

ETIMS

Every sale invoiced to KRA

Each sale gets a KRA-compliant electronic invoice with its control-unit number, time stamp and QR code, automatically.

LIABILITY

What you owe, every day

Broken down by tax, period and due date. No waiting for month-end to find out.

PIN CHECK

Suppliers verified before you pay

An inactive KRA PIN or a missing eTIMS invoice puts the payment on hold, before it becomes a disallowed expense.

DEADLINES

Warnings at 14, 7 and 3 days

Then on the day. Miss a payment and you see the penalty and the interest growing each day.

VAT 16%

VAT returns prepared for you

A pre-filled return each month, with input VAT only from verified supplier invoices, checked against what you declared.

WHT • CIT

Withholding & corporate tax

Withholding certificates and deadlines, and a running estimate of this year's corporate tax at 30%.

ACCOUNTS

Your books, always current

Revenue by branch, expenses, margins, money owed both ways, a 90-day cash-flow forecast and a compliance score.

PAYROLL

PAYE, SHIF, NSSF & Housing Levy

Computed for every employee, every run, with any gap between what was deducted and what was remitted flagged.

LICENCES

No permit lapses quietly

County permits, fire, health and sector certificates, with renewal alerts at 60, 30, 14 and 7 days.

We don't just guard your business.

We guard your money.

What OJO Sentinel covers that others miss

Most accounting software handles what you put into it. OJO Sentinel checks your operations against your books, and your books against KRA.

- 01 A storekeeper reports 200 units sold, but the till counted 240. The gap is flagged as missing cash and undeclared VAT at once.
- 02 A supplier's invoice arrives with an inactive KRA PIN. Payment is held before it becomes a disallowed expense.
- 03 Sales grew this month but the VAT return didn't. The gap is flagged as a compliance exposure.
- 04 One branch loses money while the others profit. It's identified, with its cost structure, for your review.
- 05 PAYE was paid three days late. The penalty is logged and the interest is calculated daily until it's paid.
- 06 A county permit expired eight days ago. You were warned for 60 days, and the breach stays on record until it's renewed.

AUTONOMOUS INTELLIGENCE

Your business runs itself. You just watch it grow.

OJO Sentinel doesn't wait to be asked. It opens the day, checks who is really signing in, watches power, internet and every device, arms the alarm at night and reconciles the shift at close. It calls people only when something needs a human.

Owners see everything. Nobody has to press start.

stock count	18	12	MISMATCH

The Autonomous tab in the live demo.

FACE CHECK

No borrowed logins

Every shift sign-in and door is checked against the live face. A borrowed login is refused.

CALLS

It picks up the phone

A truck leaves its route and you are called at once. Unanswered critical alerts go to your backup.

BLIND SPOTS

Where cameras can't see

Long stays and repeated trips into blind spots are flagged. Tagged equipment leaving its zone raises an alarm.

SHIFT REPORT

Every day reconciled

Attendance, stock, cash, incidents and system health, written up at close.

SILENT WITNESS

Recording before the alert

Near an alert threshold, recording starts quietly. If it becomes an incident, the footage is there.

ACROSS BRANCHES

One pattern, many stores

A face from an incident at one branch turning up at another is flagged, and so is a loss repeated across stores.

POWER • NETWORK

Nothing goes dark quietly

Power cuts, generator switchover, internet failover, and devices that drop offline or overheat.

EXPIRY

Stock that expires, caught early

Batches sold earliest-first, slow stock sent where it sells faster, disposals checked.

FORECAST

Where the next loss will be

Shrinkage forecast by product, hour and staff rotation, beside what people reported.

THINGS IT CATCHES ON ITS OWN

Each of these reaches the owner without a manager in between.

A storekeeper writes off 15 bars of soap as expired. None had. The owner is told the same minute.

A delivery of 20 phones is signed off as complete. Only 18 arrived. Manifest and count, side by side.

The unrecognised face from a night intrusion in Mombasa walks into the Nairobi store six days later.

160 bags of maize flour expire in three days and the store sells 38 a day. Mark them down now.

A fight breaks out on the sales floor. Security is dispatched with one tap, with the live feed.

The Kampala door controller stops reporting. It's flagged offline before anyone notices the door is unlocked.

PRICING

One subscription. Pick how far it watches.

Basic

For a single shop stopping losses on the premises.

KES **10,000**

a month, or 100,000 a year

1 STORE

- Smart CCTV brain on your existing cameras
- Faces, restricted areas, weapons, lockdown
- Day and night security modes
- Stock counts checked against the storekeeper
- Till, refund, cash and payout monitoring
- Owner-direct alerts, live feed, audit record
- Email support

MOST POPULAR

Standard

For branches, deliveries and KRA filings.

KES **30,000**

a month, or 300,000 a year

UP TO 5 STORES

All of Basic, plus:

- Goods in transit: seal and weight checks
- GPS and satellite tracking
- Fake-email and hacker detection, honeypots
- Behavioural AI that keeps learning
- Tax & Finance: eTIMS, VAT, payroll, licences
- Stock expiry control
- Email and phone support

Premium

For multi-branch operations that run themselves.

KES **50,000**

a month, or 500,000 a year

UNLIMITED STORES

All of Standard, plus:

- Autonomous store day and shift reports
- Face-verified sign-ins and doors
- Power, internet and device monitoring
- Automatic calls and one-tap dispatch
- Silent Witness and blind-spot tracking
- Cross-branch patterns, loss forecast
- Priority support, named account manager

Yearly: 2 months free

A year costs ten months and runs 365 days.

M-Pesa or card

Pay from your dashboard by M-Pesa, Visa or Mastercard.

Your currency

Prices shown in your local currency as a guide.

Billed per business in Kenyan shillings. A single M-Pesa payment is limited to KES 250,000, so yearly Standard and Premium are paid by card. Cameras, sensors and trackers are not included.

SEE IT FOR YOURSELF

Step into the owner's command centre.

Set off a weapon alert, a tampered delivery or a storekeeper hiding a loss. Then switch to a manager and try to make it go away.

Open the live demo

pizzatechies.github.io/ojo/demo

Four stores in Nairobi, Mombasa, Kampala and Lagos. 13 incident types to trigger. Owner and manager views. Runs in your browser, nothing to install.

WORKS WITH WHAT YOU HAVE

It sits on top of your existing setup.

Any camera, any brand

Hikvision, Dahua, Axis, Uniview or generic. RTSP, ONVIF, HLS.

Shelf and RFID sensors

Counts from RFID gates, shelf-weight sensors or cameras.

Trackers and satellite tags

Trucks, cargo and personnel, on the map in real time.

Point of sale and payments

Cash, card and mobile money: sales, refunds, voids, payouts.

Your email

Every incoming email checked before staff act on it.

Doors, alarms and power

Lockdowns, night arming, routers, UPS and generators.
